SECTIONS:

14

The Fish and Wildlife program goes out and takes care of the habitats for elk, deer, etc. They have an aviary for wild eagles that they care for as well. They really look for poachers and for the fish they look for red blood suckers which are trout fish with red stomachs which are bad. At my school, we had a service learning class and got to go around the community for a job sight and the Fish and Wildlife was my job sight. I have learned how to take care for the Eagles in the aviary, like feed them and do physical checkups on them as well. I also worked in the office and filed paperwork and reviewed the orders for feathers.
