Be It Enacted By The American Legion Auxiliary New Mexico Girls State 2015

Section 1.

Many homes are built on land that uses private wells in New Mexico. However some of these properties have wells that were built improperly meaning families have to live with contaminated water coming out of their faucets. Some water cant be used for bathing. Many families can't afford to fix this problem in their homes and are forced to buy bottled water for everyday uses.

Section 2.

Contaminated – An object or substance that is unwholesome by pollution.  
Contractor – A person or company that is hired to build or preform a service  
Remburse – The act of repaying someone who has spent or lost a lot of money.

Section 3.

Current building code should be further enforced and contractors should be help to blame for improperly installing a well.

Section 4.

Create more strict building code for private wells.  
A. Update current building codes for wells.  
B. Contractor must reimburse family if their well was built improperly.

Section 5.

This act shall become effective after its passage of becoming a law.
